	Pumpkinseed sunfish
	Banded killifish

Physical Characteristics

Area - 8 acres	Temperatures
	Surface - 67°F
Maximum depth - 21 feet	10 feet - 56°F

Principal fishery: Brook trout

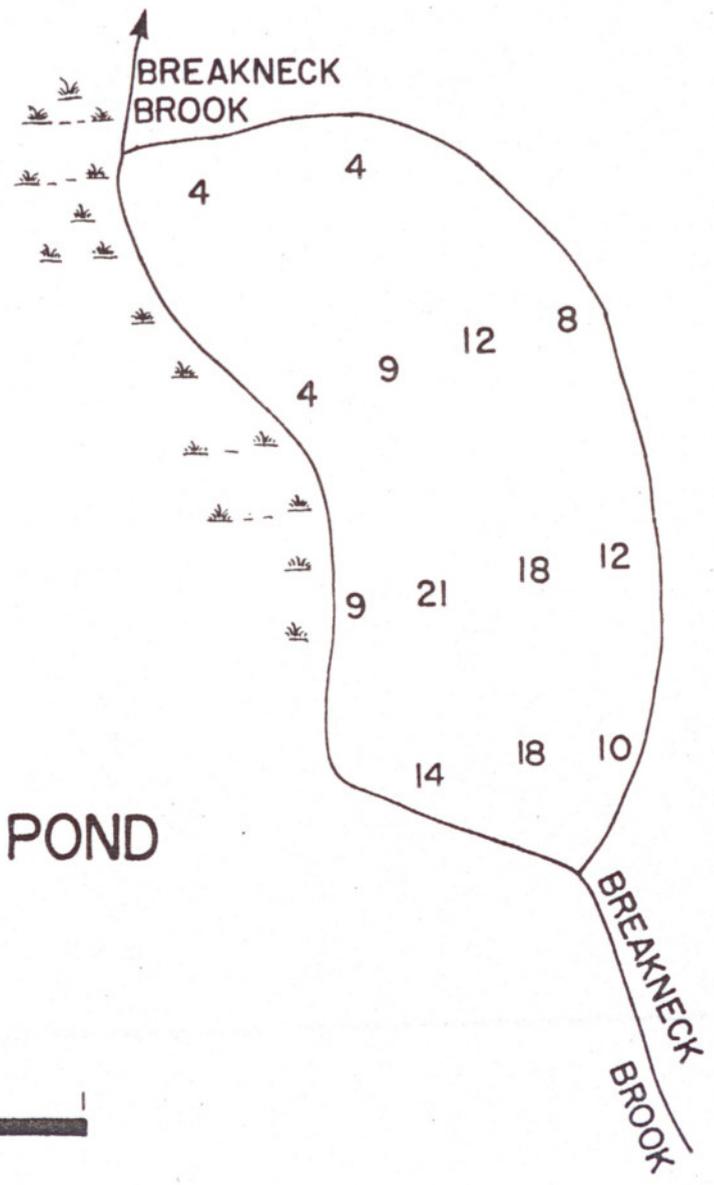

Lower Breakneck Pond is a cool, weedy, clear-water pond located in scenic Acadia National Park on Mount Desert Island. The pond's numerous beaver houses are popular with nature lovers and hikers. Access to the pond is either by walking or bicycling about 1 1/2 miles along one of the park carriage roads; take the Eagle Lake entrance.

Lower Breakneck Pond has sufficient cool, well-oxygenated water for brook trout. Although both Lower and Upper Breakneck Ponds are stocked annually with fall fingerling brook trout, Lower Breakneck provides a more consistent fishery.

The pond is closed to ice fishing.

Surveyed - August, 1962  
(Revised - 1988)  
Maine Department of Inland Fisheries and Wildlife
